

OTTER CREEK GOLF COURSE

FROM THE COLUMBUS VISITORS CENTER : WWW.COLUMBUS.IN.US

AWARD-WINNING, YET OPEN TO THE PUBLIC

Few courses with such a pedigree are open to the public, but Otter Creek is open to anyone. Year after year, Otter Creek is placed in the top 25 public courses in the nation. The course includes 27 holes, including a new 9 designed by Rees Jones.

DESIGNED BY ROBERT TRENT JONES, SR.

Just like the renowned architecture of Columbus, Otter Creek is the work of one of the great golf course designers, and it's one reason the course has received so many accolades. It manages to balance a challenge to your game with a beauty you'll appreciate.

AND THIS IS JONES' BEST CREATION, EVER

After more than 500 courses designed, Robert Trent Jones concluded that #4 at Otter Creek was the single best hole he ever designed. And, you can play it, right here in Columbus!

REGULAR HOST OF CHAMPIONSHIP EVENTS

Otter Creek regularly hosts regional, state, and NCAA events, including hosting the 2010 NCAA Women's Division I Regional Championship and the 2011 Indiana State Men's Amateur Championship. Phone: 812-579-5227

TIMBERGATE GOLF COURSE

READY TO PLAY SOME LINKS-STYLE GOLF ON FUZZY'S COURSE?

FUZZY MADE IT, YOU CAN PLAY IT!

Indiana native Fuzzy Zoeller has decades of golf behind him (and two majors) and Timbergate adds to his portfolio of courses he's collaborated on, and this one's a beauty.

PLAYABLE FOR EVERY LEVEL OF GOLFER

The links style course was designed to be challenging to experienced players as well as playable by higher handicappers. Each hole has at least five bent grass tee beds to vary the yardage of the course.

A UNIQUE KIND OF GOLFING BEAUTY

Eleven ponds and several bunkers skirt the bent grass fairways and greens. Blue grass and fescue roughs surround every hole, giving each its own unique identity.

ENJOY THE UNINTERRUPTED VIEW

Links-style golf is a different kind of golfing experience, imagine only an undulating fairway between you and that four-inch hole, and yet, the birdies still somehow aren't automatic!
